

Hackathon 2014

A Hackathon was specially organized by NP's Idearwerkz and the School of InfoComm Technology (ICT) for the ICT students to innovate and create applications on smart watches (23 - 30 Jun 2014).

Sixteen ICT students took part. They attended a one-day workshop on programming on Pebble Watch, after which they had a 2D1N boot camp on campus to innovate, idea create and develop their apps on the Pebble watches.

Some of the winning entries were apps created for old folks to get around, school timetable with reminder of class location, flight locator, world cup score monitor, etc.

The students displayed great teamwork as a group and were helping one another collaboratively even during the competition. They exhibited our NP ICT Can-Do spirit and Take IT Higher!

More photos are available on our [ICT Flickr](#).

Our Courses

- Animation & 3D Arts (N92)
- Financial Informatics (N81)
- Information Security & Forensics (N94) - NEW!
- Information Technology (N54)
- Multimedia & Animation (N55)
